JENNY MCELVANEY

**dip NT, dip HM, dip LC, dip Ac. LAc,
(Vietnam), NTOI, AFPA.**

“My extensive research and education in Herbal Medicine has contributed to my development of an innovative approach to healthcare. I have travelled to the US, Vietnam and numerous European Countries, researching and training under some of the Worlds renowned doctors.

While studying Nutritional Therapy using Functional Medicine I discovered treating the body as a whole is vital, and the only way to get to the root cause of the health issue. Thanks to this combination of skills, I have great flexibility in working with clients.”

Jenny McElvaney

Jenny is a fully qualified Irish Nutritional Therapist and has furthered her career in to Herbal Medicine and Acupuncture. After more than a decade of practicing nutritional science, **herbal medicine** and acupuncture, this has enabled Jenny through practical experience to become one of Irelands leading contemporary experts when it comes to the **nutritional value of Cannabinoids.**

Through her years of experience, she has discovered what works, what doesn't, and what it means to live a truly full life. Jenny's practical advice combined with **Hempture CBD** has helped many people recover to full health without the need for synthetic chemicals.

To start restoring your health book a professional consultation on Hempture CBD, Herbal Medicine or Nutritional Therapy by simply contacting Jenny today via jenny@hempture.ie

WHAT IS **CBD**?

Cannabidiol (CBD) is a chemical compound found in Hemp and Cannabis plants. CBD is thought to have potential utility for treating a wide range of symptoms and illnesses, including anxiety, inflammation, pain, seizures and even chronic addictions such as alcoholism.

CBD is a Phytocannabinoid discovered in 1940. It is one of at least 113 identified Cannabinoids in cannabis plants and accounts for up to 40% of the plant's extract. CBD can be used in multiple ways including by inhalation of smoke or vaping e-liquid, by mouth in the most common form of CBD oil, in addition to capsules, dried cannabis, hemp tea, or in cream and balms etc.

CBD has no psychoactive effects and is not thought to alter a user's state of mind. This makes the molecule attractive to those looking to medicate without the "stoned" feelings often associated with THC, particularly with those who suffer from anxiety. CBD is also generally considered to be safe at high doses and has not shown indications of causing dependency.

CBD is also being looked at closer at several academic research facilities for its potential anti-cancer properties. The first documented use of cannabis-derived medicine dates back to 2737 BC when Chinese Emperor Sheng Nung used a cannabis-infused tea to aid with a variety of ailments including memory, malaria, rheumatism and gout.

It wasn't until 1839, when **Irish physician** and medical researcher, William B. O'Shaughnessy, published a study which investigated the plant's therapeutic effects, that researchers did begin to consider the medical applications of cannabis.

While the Irish researcher may have not realised it then, he had just opened the door towards the discovery of the compounds that would one day be referred to as cannabinoids.

This brings us to the modern age and the possibility that Endocannabinoid Deficiency Syndrome (**ECDS**) could be the cause and rise of so many diseases and illnesses in this day and age. The Endocannabinoid system regulates our body's homeostasis, a state of harmonic balance where everything works as it should.

After all.. When the Cannabis plant was 'banned' nearly 100 years ago they essentially removed Cannabinoids from the human diet - in essence what they did was deprive the human race of a what is now widely considered an essential micronutrient, or in simple terms - a Vitamin, that your body needs in small quantities for the proper functioning of its metabolism... **A shocking coincidence?**

WHAT IS ECDS? **Endocannabinoid Deficiency**

Syndrome (ECDS) is a condition where an individual's body produces a lower amount of cannabinoids than experts consider to be essential in the promotion of health, vitality, and well-being.

The theory of ECDS explains that these health conditions are due to a deficiency in Endocannabinoid levels, akin to the way neurotransmitter deficiencies are behind other illnesses - like serotonin deficiency in depression for example. The theory is that the cause of these syndromes is an insufficient amount of Cannabinoids in your body - it's that simple.

The Endocannabinoid System (ECS) is present in every major bodily system, which is how its dysfunction can theoretically cause such a variety of conditions - and how cannabis manages so well to treat them!

Renowned cannabinoid researcher Dr. Ethan Russo first proposed the theory of Endocannabinoid deficiency in 2004. In a study, published in *Neuro Endocrinology Letters*, Russo suggested that deficient cannabinoid levels might explain why some conditions develop. Cannabinoids found in plants like hemp, including cannabidiol (CBD), are analogous to the Endocannabinoid's naturally produced by the body. Research shows that they interact with the cannabinoid receptors of the Endocannabinoid system to elicit chemical responses that help bring about homeostasis.

While more research needs to be done before endocannabinoid deficiency can be proven beyond doubt, the theory could open the door for methods to prevent and manage certain conditions. Russo believes cannabinoids from cannabis plants like hemp are essential nutrients that can minimise certain diseases by assisting the endocannabinoid system and ensuring that it functions properly. The endocannabinoid system has been recently recognised as an important modulatory system in the function of brain, endocrine, and immune tissues. It appears to play a very important regulatory role in the secretion of hormones related to reproductive functions and response to stress.

You shouldn't assume that your doctor is well versed in current medical cannabis literature. One way to find out his level of knowledge is to inquire if he or she has attended any education programs or workshops about cannabis recently. You shouldn't be surprised if the answer is "no."

So the next time you're at the doctor's, whether you suffer from a chronic illness, or not, think about asking your doctor what you can do to improve the health of your Endocannabinoid system.. And maybe put some pressure on them to find out!

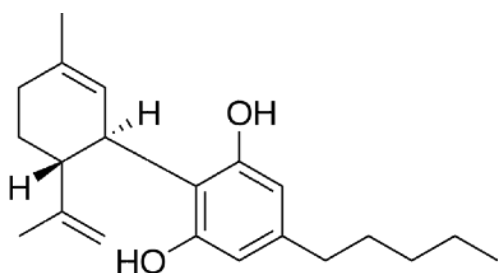

WE ARE **IIHA APPROVED**

The IIHA approval scheme provides quality assurance and it plays a fundamental role in promoting quality Hemp products to the consumer within Ireland.

The **Irish Industrial Hemp Association** operates a series of quality assurance schemes for the CBD and Hemp industry. The schemes are built on best practice in cultivation from seed to shelf.

WHAT REAL PEOPLE ARE REALLY SAYING ABOUT HEMPTURE CBD

Hi to one and all.

2017/04/22 at 10:44 am

I struggle everyday with debilitating pain from chronic fibromyalgia. At the moment, and the last 15 yrs the pain has been managed with high doses of opioid pain killers, that was until I used CBD oil and vape juice. Currently I'm still on a fentanyl patch but have suspended the use of the 4 x 20mg daily Oxynorm. The pain relief from the CBD is subtle unlike the opioids, and after a few inhalations from the vape along with a few drops of CBD oil I just tend to forget I'm in excruciating pain as it drifts away and I get on with my day. Quite amazing.

Regards, Frazer

Purchased this as recently stopped smoking weed. (I don't mind being honest) I was fine with not being high all the time but I felt very fidgety at times. After getting this I can 100% go about my day. O nice relaxant to the body but your head is on point. A great extra benefit is since getting this I have gone for vaping with 12mg nicotine to just this CBD oil (0nicotine) I have absolutely no urge for a cigarette. Extremely impressed and would highly recommend

2017/04/05 at 2:47 pm

Also cheapest price online that I could find. Amazingly quick postage and really friendly guys to deal with.

I can not think of one complaint from start to finish.

Comment	In Response To	Submitted On
<p>I have been using hemprure cbd vape oil for a month so far, having being diagnosed with ptsd two years ago I was on a vicious cycle of not sleeping feeling depressed no focus no understanding , I only slept with Xanax or a sleeping tablet, cbd has changed my life around I now sleep with no meds</p> <p>More energy</p> <p>More focus</p> <p>Relaxed and comfortable throughout the day with focus</p> <p>I'm also positive</p> <p>It's also eased my symptoms of costochondritis</p> <p>It helped me, could it help you?</p>	<p>Hempture Hemp CBD Vape E-Liquid (50mg CBD) 10ml (3pk)</p> <p>View product</p> <p>21 ⁶</p>	2017/12/15 at 2:13 pm
<p>Hi all just got my new vape kit/pen and I can say it`s the best thing I have used for vaping you get all the vape oil, not like the vape pen from the shops were I got my first one from so a big thank you to all at Hempture keep up the good work for all of us who have pain and now for me I have a lot less pain now.</p> <p>Thank`s Kevin (kerry)</p>	<p>Hempture CBD Vape Starter Kit (A)</p> <p>View product</p> <p>0 ¹³</p>	2017/07/11 at 12:16 pm
<p>I have always had a hard time with ingesting protein powder. Today i received some of this and it is lovely to drink, easy on the stomach and also natural. It has loads of amino acids and a good all rounder. Will be in my cart along with vape oil the next time. Thanks hempture for the great service</p>	<p>Hempture RAW Hemp Protein 1KG</p> <p>View product</p> <p>0 ³</p>	2017/07/11 at 8:59 am
<p>So I was uber impressed when I first came across hemptures CBD range and was a major fan of the 50mg vape oil, saw this bad boy when last ordering and is the bees knees of vape juice. Judging the 2 against each other I would say the feeling/results you get from both are relatively similar however with the 200mg it comes a hell of a lot quicker. I find with CBD your body has to get used to it (may just be me) but don't be put off if you were unhappy with your first tank. The more you vape it the more it works. Starting with this I felt the effects after 7 minutes of vaping compared to the usual 40/60 minute mark with the 50. Top notch quality and definitely worth the extra dosh.</p> <p>Happy vaping guys!</p>	<p>Hempture Hemp CBD Vape E-Liquid (200mg CBD) 10ml</p> <p>View product</p> <p>2 ¹⁰</p>	2017/07/06 at 8:59 pm
<p>Hi all I am on CBD Vape-e-liquid for about 3 months now I have nerve damage from my back down one leg and in pain a lot from a motor bike crash and my son said for me to try CBD Vape and I can tell you it works for me so I'd like to thank all at Hempture.ie for the good work getting this out for us in Ireland and I have one thing to ask is for them to sale the Vapour pens as there is a lot of pens out there that are not good for Vaping thank`s again team</p> <p>Kevin O`Callaghan . Wonderful quality product, fast shipping, and excellent customer service. I'll definitely be purchasing again soon!

Very happy with my repeated purchase. Vape oil is very good, nice pleasant smell and taste. Will buy again.

Cannot believe that something so natural has helped my family so much, great company, excellent customer serv8ce
100 stars

Mr Jet

What up guys! First of all I am no longer smoking nicotine. I tend to live a very healthy lifestyle. That doesn't mean you cannot party, right? CBD vaping oil fits this place nicely. It's perfect for that occasional smoke one tends to want without ruining your health. Not only it has plenty of proven medical benefits but can easily take the edge off. Works great as a sleep aid and tends to raise your mood. It has countless benefits. It doesn't get you high albeit it does give you a pleasant merry mellow and relaxed feeling. The healthier you live, the more you're going to appreciate it!

The quality of this brand is pretty awesome. It tastes like a healthy, fresh hemp and I can only say that it does work. The price is a steal. It's locally produced. What more could you want?

Oh, and the delivery time was just stellar. I got it within two days, just for the long weekend.

I believe with every quality service comes a faithful customer and it looks like those guys just earned one! Keep it up!

Have vaped this wonderfull hemp oil for a week and i can tell you, i dont have any more pains in my leg, before i used to have cramps, restless legs.
These babies are after helping me a Great deal..
Dont like the taste of it
So i mix it in with Menthol e.liquids..

It is definitely helping to ease the pain of rheumatoid arthritis that I have had for over 2 years, even with a controlled diet the soreness did not totally abate but I can feel a total change since taking the oil, I started in December so I have ordered another 50ml, there is nothing like feeling well & without pain, thank you, Catherine Griffiths

I've had my first day using this nutrition and its simply brilliant. I don't smoke, I am chronic asthmatic and also get cortisone shots. Old age is catching me fast!! Back is stuffed, joints are creaking, over worked etc, you get the picture.
I trusted the endless amounts of google studying I've done and glad I found Hempture.
I'm not wheezing and my aches are remotely even noticed. All after just the first day!?!
Like wtf!?
The taste for me is great. A subtle weed flavour which I dig.
Recommendations going out to all to taste the difference.
Cheers

Great product! Your natural hemp flavour eliquids are great tasting (and smelling!) but when I want a fruity vape I use these crystals. Anyone that is considering it, it is as easy adding the whole pot of 500mg crystals to 5ml of plain PG (cheap and easy to find online) Now you have five 100mg 'shots' you can add to any 0mg nicotine vape flavour, or add the whole thing to a 40-60ml big bottle! With the new TPD regs there are loads of 40-60ml bottles of eliquid at 0mg nicotine, so the flavour combos are endless. Strawberry lemonade CBD vape? Delicious and relaxing!

Date 2016-10-26 10:38

Hi,

I am just writing to add a testimonial to your collection! Our son is 14 years old, severely autistic, non-verbal and he had become very aggressive and unhappy over the last year, in particular. Living with him had become very difficult and trying for all of our family, with daily physical assaults on us for no apparent reason. I decided to try a cbd oil from the US which I sourced in the UK because of some reports online from other parents in a similar situation and the effect on him was remarkable and instantaneous. He was markedly happier, less aggressive and in better control of his outbursts.

We were delighted to find an Irish source, and switched him over last week. Although completely non-verbal, he had learned to communicate using a letter board before he became too out of control to use it. His tutor comes from England a couple of times a year and we happened to have a session on Friday so she asked him to tell her about his experience with CBD.

He said that he is doing much better, the new oil he is taking (yours!) is very strong, but he likes that about it....the stronger the better (his expression). When he is older he would like to sell CBD oil because it is a way to help people to feel better, he would like to sell it all over the world and his business would be called 'Herb man'. He would only employ his family but it would be a non-profit because the most important thing in life is helping other people.

I don't think that anyone could understand what it means to us to have found something to make him feel happier and calmer, better about himself and more in control of his emotions and body. We were in despair and now we can see a life ahead that is normal by our standards. My sister was schizophrenic and she committed suicide so I could not bring myself to put him on anti-psychotic medication, our only other option. I knew too much about how it made her feel. We literally had nowhere to turn when we found CBD. I have given your leaflet to our tutor to take back to families in England whose autistic children are on cbd and have problems with supply now due to the re-classification as a medicine.

Please accept sincere and heartfelt thanks from us!

Sinead Conneely, mother of Caomhan Murphy, delighted customer!

SPONSORSHIP FOR REAL ATHLETES

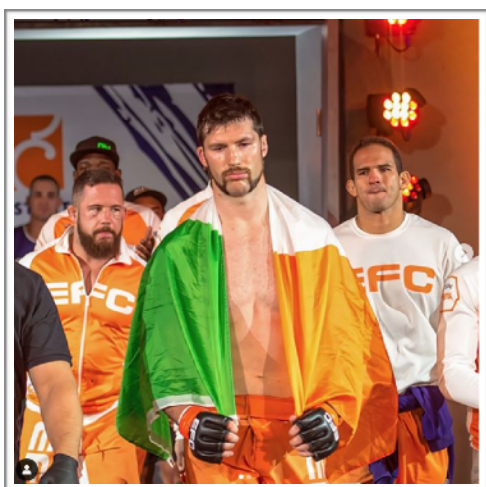

**With dedication comes victory!
With Hempture #CBD comes
natural recovery.**

We have genuine enthusiasm and passion for sport in Ireland, we continue to collaborate with leading and up coming athletes, sports injury management experts and gyms in Ireland.

*CBD is **now permitted** by both the World Anti-Doping Agency and the U.S. Anti-Doping Agency.*

With the assistance of Hempture CBD athletes can recover quicker! An increasing number of clinical trials show the efficacy of CBD as an anti-inflammatory and potential for decreasing sleeplessness, both key for adequate muscle repair.

*As the data continues to show promise of CBD's potential for boosting recovery in-between workouts, its time you take your game to the next level naturally with the help of **Hempture**.*

Will Fleury Pro MMA fighter - SBG Ireland

apexsportsmanagement Will seeing great results from using the @hemptureofficial cbd range 🍀

Repost @willfleury @sbgireland with @get_repost

Been using @hemptureofficial CBD products for the last 20 days and have definitely noticed a difference in sleep quality and have also noticed my knuckles seem to be less inflamed after pad/bag sessions. High times for Will. #hempture #cbd #cbdoil #cbd vape #cbd ireland
